

CALIBER 706.B – 10½"

Product Specifications

Analog quartz movement

Line	xtratech
Caliber	706.B
Size	10½"
Version Swiss Made	5 Jewels / gold plated EOL
Standard battery life	44 months
Standard hand fitting height	1

Functions

- Multifunction
- Moon phase
- Day by hand
- Date by hand
- 3 hands
- Week by hand

Features

- Repairable metal watch movement
- Power saving mechanism with pulled out stem:
Reduction of consumption approximately 70%

CALIBER 706.B – 10½"

Technical Specifications

Diameter Total	23.90 mm
Case fitting	23.30 mm
Movement height	3.70 mm
Height over standard battery	3.86 mm
Movement rest	0.30 mm
Height over stem	2.20 mm
Length of stem travel	0.55 mm
Stem thread	0.90 mm
Useful torque second – typical	12 µNm
Useful torque minute – typical	600 µNm
Operating temperature	0 - 50 °C
Instantaneous rate	-10/ +20 sec/month
Resistance to magnetic fields	18.8 Oe
Resistance against shock	NIHS 91-10

Battery Specifications

Standard battery	No. 371
Standard battery life	44 months
Battery voltage	1.5 V
Current consumption – typical	1.31 µA
Current consumption – maximum	2.25 µA

Fitting dial and hands

- Remove working hand
- Fit dial
- Set date hand on any index
- Set weekday hand on any index
- Pull crown on position II
- Wind hand forwards, until weekday hand has changed to Monday
- Set calendar week hand on any index
- Set remaining hands on 12:00 hrs
- Install calendar functions*
- Push crown in position I

Switching times

Moon phase	~ 20:00 hrs
Weekday	~ 24:00 hrs
Calendar week	~ 24:00 hrs
Date	~ 3:00 hrs

*Setting calendar functions

- Wind hand forwards until full moon appears in dial
- Wind hand forwards showing difference from last full moon
- Set actual time, if outside blocked time (22:00 to 5:00 hrs) otherwise turn forwards trough 5:00 hrs
- Press corrector A, until actual date is displayed
- Press corrector D, until actual calendar week is displayed (Quick adjustment is not allowed between Sat, 10:00 hrs and Mon, 24:00 hrs)*
- Set time, if not already done under point C.

Details: See Instruction Manual

General instructions

Removing the setting stem can only be effected in position I.

The use of supporting screws is essential when mounting the hands.

Permitted hand setting strenghts:

Hr. / min. hands:	<40N
Other hands:	<30N

The moon disc must not be adjusted other than by the stem. Any direct manipulation of the moon disc leads to loss of the holding force and thus will strongly impact the function.

Blocking period

During the blocking period between 22:00 and 5:00 hrs automatic changes are in progress. It is not allowed to activate the pushers A or B (quick-correction of date, day of the week) during the blocking period. Pressing the pusher during this period may cause malfunctions in the movement.

RONDA xtratech

- 706.1
- 706.3
- 706.B

You have decided to buy a watch, which was assembled by a watchmaker using a Ronda movement. Please note that no watches are produced or distributed under the Ronda brand.

In case of repairs, guarantee claims and questions concerning the functioning of a watch, purchasers and consumers should contact their retailer or the watch manufacturer, for which the relevant information can be found in the sales or guarantee documentation provided with the watch.

Cal. 706.1 Cal. 706.3

- Pos. I** **Position of rest** (watch running)
- Pos. II** *During the blocking period from 10.00 pm–5.00 am, automatic changes are in progress. It is not allowed to activate the pushers A or B or C (quick-correction of date, day of the week, month) during the blocking period. Pressing the pushers during this period may cause malfunctions in the movement.*
- Setting sequence for: moonphase display, day of the week, day and time** (e.g. after a battery change)
1. Pull crown out to position II (watch is stopped).
 2. Set the moonphase display:
 - Turn the hands forward by turning the crown, until the full moonphase position appears.
 3. Set the day of the week and date:
 - Turn the crown until the time of 06.00 am appears (= beyond the blocked time period).
 - Using the quick-change correction, set the date with pusher A, and the day of the week of the last full moon with pusher B (see table). Then using the crown, move the hands forwards until the current date appears.

Cal. 706.1 Cal. 706.3

4. Set the time:
 - Turn the crown until the current time is displayed (remember the 24-hour cycle).
 5. Push crown back into position I.
- Quick-change correction for date:**
Press pusher A, until the current date is displayed (remember the blocking period).
- Quick-change correction for the day of the week:**
Press pusher B, until the current day of the week is displayed (remember the blocking period).
- Quick-change correction for the month: (cal. 706.3)**
Press pusher C, until the current month is displayed (remember the blocking period).

Precision: +20/-10 seconds per month

Cal. 706.B

Pos. I Position of rest (watch running)

Pos. II During the blocking periods mentioned below, automatic changes are in progress. Pressing the pushers during these periods may cause malfunctions in the movement.

- Pusher A (quick-correction for the date) must not be pressed during the blocking period from 10.00 pm–5.00 am.
- Pusher D (quick-correction for the calendar week) must not be pressed during the blocking period from Saturday 10.00 pm–Monday midnight.

Setting sequence for: moonphase display, date, day of the week and time (e.g. after battery change)

1. Pull the crown out to position II (watch stopped).
2. Set the moonphase display:
 - Turn the crown clockwise past midnight, until the full moon position appears.

Cal. 706.B

3. Set the day of the week:
 - There is no quick-change correction available to change the day of the week, and so the day of the week must be changed as follows. Change the time display by turning the crown backwards and forwards (↺/↻) (↺ 01.00 am/↻ 10.00 pm/↺ 01.00 am/↻ 10.00 pm/↺ 01.00 am...), until the day of the week of the last full moon is displayed.
4. Set the date:
 - Turn the crown until 06.00 am appears in the time display (= beyond the blocking time).
 - Set the date of the last full moon with pusher A. Then with the crown move the hands forwards until the current date is displayed.
5. Set the time:
 - Turn the crown, until the current time is displayed (NB remember the 24-hours cycle!).
6. Set the calendar week:
 - Using pusher D, set the current calendar week (blocking period Sunday–Monday).
7. Push the crown back into position I.

Cal. 706.B

Quick-change correction for date:

Press pusher A, until the current date is displayed (remember the blocking period between 10.00 pm–5.00 am).

Quick-change correction for the calendar week:

Press pusher D, until the current calendar week is displayed (remember the blocking period between Saturday 10.00 pm–Monday 12:00 pm).

Zeigersetzen

Maximale Aufpresskraft:

- Stunden und Minutenzeiger: max. 40N
- Sekundenzeiger: max. 30N

Beim Zeigersetzen muss das Werk abgestützt werden.

Poser les aiguilles

Force de chassage maximale:

- Aiguilles des heure et des minutes: max. 40N
- Aiguille des secondes: max. 30N

Lors de la pose d'aiguilles, le mouvement doit être soutenu.

Hand setting

Maximal force:

- Hour and minute hands: max. 40N
- Second hand: max. 30N

The movement needs to be supported for hand setting.

Stellwelle entfernen

Beim Entfernen der Stellwelle muss sich die Stellwelle in Position 1 (gedrückt) befinden, bevor auf den Winkelhebel gedrückt wird.

Enlever la tige

En enlevant la tige, la tige doit se trouver en position 1 (poussée), avant de pousser sur la tirette.

Stem removal

For removal of the stem, the stem must be pushed into position 1 (pressed in) prior to apply pressure to the setting lever.
